The difference is in the details. Take our Queen Anne glass as an example. We start with seedy baroque glass and bevel each piece so the texture appears within the bevel. It's a detail that makes our glass unique and a feature that will make your entry a masterpiece.

# Door Ways

Don't let the simple beauty of our doors fool you: Every one of them is an amazing feat of engineering. The inner core of our stiles are finger-jointed to reduce warping and twisting. Panels are sliced down the middle and then glued back together in reverse directions, minimizing the chances for cracking and splitting. Defect-free lumber is carefully selected for each veneer. These details combine to create a stunning end result that will exceed your expectations.
