SIMPSON ROLLS OUT MONSTER DOORS™, A NEW LINE OF EXTRA-LARGE DOORS

See Simpson's Stunning New Monster Doors at the 2019 International Builders' Show

McCleary, Washington, February 15, 2019 – Simpson Door Company is taking wood door customization to new heights with its just released Monster Doors™. The stunning oversized doors can be made in heights up to 12 feet tall and widths up to 10 feet wide. They address the need for larger and more personalized spaces in the home, are offered in any wood species and design, and can be mounted on popular alternative hardware, such as barn track or contemporary pivot swing.

"These beautiful, oversized doors aren't just space dividers. They're functional pieces of art. They make a stunning visual impact in the home—open or closed," said Brad Loveless, marketing and product development manager, Simpson Door Company. "It's amazing to see what our customers dream up. We recently had a door come in that was 8 feet wide by 12 feet tall. It seems that each time we set a parameter for how big a door can be, a customer challenges us to go beyond."

Simpson's Monster Doors not only come in XL sizes, but are designed to withstand the daily challenges of everyday life. Each Monster Door is evaluated by Simpson engineering to ensure it is being manufactured in the most stable and enduring way possible, delivering the design freedom customers want with the reliability and performance they have come to expect from Simpson. Monster Doors are available for both interior and exterior door applications.

To schedule a booth appointment with Simpson Door Company (booth #C4948) at the 2019 International Builder's Show and get a first-hand look at the handcrafted doors, contact simpsondoorpr@brandner.com.
